

Practice 5-3

Concurrent Lines, Medians, and Altitudes

Find the center of the circle that circumscribes $\triangle LMN$.

4. Construct the angle bisectors for $\triangle ABC$. Then use the point of concurrency to construct an inscribed circle.

Is \overline{AB} a perpendicular bisector, an angle bisector, an altitude, a median, or none of these?

For each triangle, give the coordinates of the point of concurrency of (a) the perpendicular bisectors of the sides and (b) the altitudes.
